

Fluidor Equipment B.V. | Fluid, Drum & Containerhandling

SQUEEZER SCT650/SCT1300

DESCRIPTION

Designed for squeezing of emptied poly liners with product in order to reduce product loss to a bare minimum (< 0,1 %).

Loading/off-loading by operator for this stand-alone machine.

Machine is equipped with a collecting tray that has a drain outlet at one side on 900 mm. above floor level. Directly underneath this outlet a 200 l open drum can be placed to collect the reclaimed product.

EXECUTION

- Machine AISI 304. Except some standard trade components.

CAPACITY

- SCT 650: Poly liners out of 200 l drums, capacity determined by operator, approx. 40 liners per hour
- SCT 1300: Poly liners out of 1.000 l Tote Bins or boxes, capacity determined by operator, approx. 20 liners per hour

SCT 650:
